(54) COMMUNICATION SYSTEM

(57) Abstract

PROBLEM TO BE SOLVED: To provide a communication system which can place an order for a printed matter in an online state by using the Internet.

SOLUTION: In this communication system, the file transfer which is made in an online state for placing an order for a printed matter is made on the Internet. The manuscript for the printed matter is prepared by the receiver of the order by utilizing the template provided to a site opened on a WWW. Upon completion, the prepared manuscript is transferred to the receiver of the order on the Internet together with the personal data identifying the orderer. In placing the order, the payment can be made simultaneously by using a credit card or another account setting means on the Internet.
